

## ACCION CLIMA III - NDC IMPLEMENTATION COSTA RICA AND REGIONAL KNOWLEDGE EXCHANGE

As of: October 2021

Costa Rica wants to implement its ambitious national climate targets in sectors and actively contribute to the regional and international dissemination of good climate policy approaches. For this purpose, the project strengthens climate-friendly governance and institutional capacities for integrated climate protection strategies and policies. It develops ambitious NDC implementation projects, i. a. in the transport and waste sectors. It supports financing arrangements with the private, insurance and banking sectors, the linking of green fiscal reform and climate incubators, and the development of monitoring mechanisms. The project also strengthens cooperation on climate protection at local level with municipal actors and the private sector. Green recovery also plays a role here. Regionally, it provides a hub for innovative NDC implementation as well as an interface for ICI projects in Central America and the Caribbean.

### State of implementation/results

- Information, results and progress of the project are disseminated in the social networks of GIZ Costa Rica and in the IKI Newsletter Central America/Caribbean.

## PROJECT DATA

### Country/Countries:

Costa Rica

### Implementing organisation:

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH
