

ADAPTING TO CLIMATE CHANGE AND CONSERVING BIOLOGICAL DIVERSITY

As of: October 2021

The project supported the development of national strategies for the adaptation to climate change and conservation of biodiversity, and implemented appropriate pilot measures. To this end, it worked closely with relevant government bodies, local authorities, the private sector and civil society. The project strengthened existing structures such as the Secretariat of the Climate Change Commission by providing intensive consultancy services and training schemes. It financed specific measures to preserve biodiversity as part of small-scale projects. The project also raised awareness within government agencies and the general public on all aspects of climate change.

State of implementation/results

- Project completed
- Advisory services provided to the Inter-Agency Committee on Climate Change (IACCC) on restructuring the Climate Change Office within the Department of Environment and Natural Resources; support was given to the Climate Change Commission in building a pool of climate expertise
- Support was given to partners in developing the Philippine Strategy on Climate Change Adaptation (PSCCA) for 2010-2022, which included strategies for 11 sectors and also involved mainstreaming gender as a cross-cutting theme
- A total of 26 small-scale projects to ensure more effective protection of biotopes and endangered species were carried out
- Activities to raise awareness and promote regional/international dissemination of findings were carried out. They included a range of events on climate change, such as an event at the Asia Adaptation Forum and a side event at the 2009 climate negotiations

PROJECT DATA

Country/Countries:

Philippinen

Implementing organisation:

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH

Political partner(s):

- Department of Environment and Natural Resources (DENR) - Philippines
- Presidential Task Force on Climate Change - Philippines

Implementing partner(s):

- Department of Environment and Natural Resources (DENR) - Philippines

BMU grant:

€ 2,475,469.95

Duration:

12/2008 till 11/2011
