

## CAPACITY BUILDING FOR CLIMATE PROTECTION

As of: October 2021

The purpose of the project was to provide advice and promote the exchange of expertise with the aim of creating an enabling environment for climate protection measures and extending the political and economic dialogue with the partner countries in the area of climate protection. Local demonstration projects were intended to serve as showcases and to present German industry with options for technology transfer. Specific local measures included the provision of advice on the development and implementation of Clean Development Mechanism (CDM) projects, the development and diffusion of customised technologies for supplying rural households with sustainable energy, and the afforestation of degraded landscapes with tree species that are adapted to the increasing aridity.

### State of implementation/results

- Project completed
- Support provided for ten individual activities carried out in Kazakhstan, Uzbekistan and Kyrgyzstan, Turkmenistan, Tajikistan, Serbia and the Republic of Moldova
- Cooperative climate protection partnerships established and maintained
- Specific activities can be linked into climate policy dialogue processes in a variety of ways, or can be designed as elements of such dialogue processes themselves

## PROJECT DATA

### Country/Countries:

Aserbajdschan, Georgien, Kasachstan, Kirgisistan, Republik Moldau, Serbien, Tadschikistan, Turkmenistan, Usbekistan

### Implementing organisation:

Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH

### Political partner(s):

- Diverse climate change relevant institutions in the respective partner countries/Diverse klimarelevante Institutionen in den entsprechenden Partnerländern

### BMU grant:

€ 1,571,435.16

### Duration:

08/2008 till 03/2010
