

CLIMATE CHANGE MITIGATION FOCUS IN ECONOMIC DEVELOPMENT IN THE DONETSK REGION AS A MODEL

As of: May 2021

The project supported approaches for the improvement of energy efficiency in highly emission intensive sectors of the Ukrainian economy. Therefore an energy management system has been introduced in three companies in the industrial sector. This energy management system gives clear recommendations and has been combined with education and training measures. On the basis of assessments of economic viability appropriate financing options have been identified. Innovation partnerships with German enterprises offered opportunities of direct knowledge exchange.

State of implementation/results

- Project completed
- Three pilot companies have introduced an energy management system following ISO 50001.
- Energy audits and training conducted
- Data on resource efficiency and energy consumption as well as saving potentials gathered and analysed
