

ENERGY STRATEGIES OF KAZAKHSTAN - CHANCES FOR AN ENERGY EFFICIENT DEVELOPMENT PATH

As of: October 2021

Kazakhstan has great potential for implementing climate protection measures, especially by increasing energy efficiency and providing renewable energy. The German Energy Agency was supported in this project to prepare and hold an international conference in Kazakhstan in September 2008. The conference dealt with questions concerning the development of energy consumption in Kazakhstan and the future energy supply structures in the country. One focus has been the future transformation of the power sector.

State of implementation/results

- Project completed.

PROJECT DATA

Country/Countries:

Kasachstan

Implementing organisation:

Deutsche Energie-Agentur GmbH (dena)

BMU grant:

€ 44,972.88

Duration:

08/2008 till 10/2008
