

GLOBAL KNOWLEDGE TRANSFER ON ENERGY EFFICIENCY

As of: February 2021

The project used a step-by-step process to set up the International Energy Efficiency Initiative (IEEI). The aim of this initiative was to share knowledge on energy efficiency with decision-makers in politics and industry and other target groups and feed it into strategies and political processes. In order to create a network of partners, the project partners first evaluated the informational and advisory needs of the principal stakeholders in the five major emerging economies and assessed their willingness to collaborate. In addition, the project developed a strategy and content for a new internet portal to pool relevant information in a systematic and user-friendly way.

State of implementation/results

- Project concluded
- Internet platform BigEE created with a focus on energy efficiency in the building sector
- Collaboration with cooperation partners on setting up a communications network

PROJECT DATA

Implementing organisation:

Wuppertal Institute for Climate, Environment and Energy GmbH (Wuppertal Institut für Klima, Umwelt, Energie GmbH) - Germany

Political partner(s):

- Diverse climate change relevant institutions in the respective partner countries/Diverse klimarelevante Institutionen in den entsprechenden Partnerländern

BMU grant:

€ 194,997.86

Duration:

10/2008 till 12/2008
