

GLOBAL SOLUTIONS - "THE ROAD FROM PARIS"

As of: May 2021

The course was set for a new, global climate policy at the UN Climate Conference 2015 in Paris. Now the crucial question is, "What happens next?" The Global Solutions project follows the "Road from Paris". In emerging and developing countries, it uses web and video reports to document actions, people and projects that contribute to global warming limitation, adaptation to the consequences of climate change and the conservation of biodiversity. One focus of the reporting is on projects supported by the International Climate Initiative. Schools and educational institutions can use DVDs with these reports as teaching material. The reports are available 24/7 in several languages on a multimedia platform, together with background articles, picture galleries and audio-photo shows, and various learning packages are already available online in German, English and Spanish. /

State of implementation/results

- Project is based on the successful predecessor projects "Sustainable", "Global Ideas" and "Global Nature" and is linked to their success.
- Awards: New York Festivals „Gold World Metal“ as well as Deauville Green Award „Silver“ for multimedial Web-Special „Dora - Orangutan returns home“ ([multimedia.dw.com/...](http://multimedia.dw.com/));
- 100 videos and reportages about model nature conservation projects in German, English, Spanish and Arabic languages (as own contribution of the DW), 50 of them are projects fundend by the IKI.
- 127 thematic articles in German, English, Spanish.
- 34 image galleries.
- 9 introductory films with animated elements.
- 8 new Web-Specials.
- 6 Learning packs.
