

INTEGRATED APPROACHES TO THE DEVELOPMENT OF CLIMATE FRIENDLY ECONOMIES IN CENTRAL ASIA

As of: May 2021

The objective of the project was to support four Central Asian countries in developing a climate policy framework that promotes climate-friendly economic development. It supported the Kazakh Government in developing a Green Growth Strategy. In the other countries, project partners identified finance-ready nationally appropriate mitigation actions (NAMAs). Three NAMA concepts were developed: on energy-efficient building renovation in Uzbekistan, on energy-efficient district heating in Kyrgyzstan, and on reforestation in Tajikistan, which can also be used for other countries and sectors. The project increased the acceptance of NAMAs as a core element of an international mitigation architecture; the exchange of experiences and cooperation at the national and regional levels made a decisive contribution to further developing them. An important element of this was the promotion of technology cooperation.

State of implementation/results

- Project completed
- Development of NAMA concepts for Uzbekistan (energy efficiency in the housing sector), Kyrgyzstan (energy efficient heating), and Tajikistan (GHG mitigation through reforestation)

PROJECT DATA

Country/Countries:

Kasachstan, Kirgisistan, Tadschikistan, Usbekistan

Implementing organisation:

Deutsches Institut für Wirtschaftsforschung e.V. (DIW)

Political partner(s):

- Ministry of Economy - Uzbekistan
- Ministry of Energy and Industry - Tajikistan
- Ministry of Environment and Water Resources - Kazakhstan
- Ministry of Finance - Kyrgyzstan
- Regional Environmental Centre for Central Asia (CAREC)
- State Agency on Environment Protection and Forestry - Kyrgyzstan

Implementing partner(s):

- Rat für nachhaltige Entwicklung in Zentralasien (MKUR)
- Regional Environmental Centre for Central Asia (CAREC)

BMU grant:

€ 2,875,000

Duration:

12/2011 till 03/2015

Website(s):
