

NAMAS IN THE TRANSPORTATION SECTOR: SCOPING STUDY

As of: October 2021

For years, the transport sector did not feature prominently in the international debate on reducing greenhouse gases. The project put mitigation in the transport agenda higher up on the agenda of international negotiations under the UN Framework Convention on Climate Change. It conducted case studies in developing countries to assess the mitigation potential in the sector and developed policy recommendations for decision-makers.

State of implementation/results

- Project completed.
- Study on “Data & Capacity Needs for Transportation NAMAs. Report 1: Data Availability”, 2010: ccap.org/...
- Study on “Data and Capacity Needs for Transportation NAMAs. Report 2: Data Selection”, 2010: slocat.net/...
- Study on “Data and Capacity Needs for Transportation NAMAs. Report 3: Capacity-building Needs”, 2010: ccap.org/...

PROJECT DATA

Implementing organisation:

Center for Clean Air Policy (CCAP)

BMU grant:

€ 397,552

Duration:

08/2009 till 06/2010
