

INTERNATIONAL CLIMATE INITIATIVE (IKI)

IKI news – Climate and biodiversity financing in practice

The International Climate Initiative (IKI) of the Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) has been financing climate and biodiversity projects in developing, newly industrialising countries and in the transition countries since 2008. The IKI supports efforts towards a comprehensive global climate agreement, forms part of the German climate financing, and fosters synergies between climate protection and biodiversity conservation. Read more about how this innovative form of climate and biodiversity financing works and which projects the initiative funds.
