INTERNATIONAL CLIMATE INITIATIVE (IKI)

IKI news – Climate and biodiversity financing in practice

The International Climate Initiative (IKI) of the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) has been financing climate and biodiversity projects in developing, newly industrialising countries and in the transition countries since 2008. The IKI supports efforts towards a comprehensive global climate agreement, forms part of the German climate financing, and fosters synergies between climate protection and biodiversity conservation. Read more about how this innovative form of climate and biodiversity financing works and which projects the initiative funds.

NEWS FROM THE PROJECTS

News on the South African International Renewable Energy Conference (SAIREC 2015)

As of today IKI offers news, information, facts and figures on the South African International Renewable Energy Conference (SAIREC 2015) at <http://www.international-climate-initiative.com/en/SAIREC>

IKI will take you to Brazil and Mexico, where solar thermal energy as a resource-saving and affordable alternative for water heating is promoted or to small islands states that cooperate with IKI to convert their energy production from diesel generators to solar. Have a look at videos jointly produced by Deutsche Welle (dw) and IKI that present IKI-supported „Global Ideas“ – for example new ways to generate energy in India or the implementation of Morocco’s ambitious solar plan.

Our news keep you up to date on all IKI projects worldwide.

We look forward to your visit.
