

INTERNATIONAL CLIMATE INITIATIVE (IKI)

IKI news – Climate and biodiversity financing in practice

The International Climate Initiative (IKI) of the Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB) has been financing climate and biodiversity projects in developing, newly industrialising countries and in the transition countries since 2008. The IKI supports efforts towards a comprehensive global climate agreement, forms part of the German climate financing, and fosters synergies between climate protection and biodiversity conservation. Read more about how this innovative form of climate and biodiversity financing works and which projects the initiative funds.

COP23

IKI at the COP23

From 6 November onwards, delegates from 197 countries will be travelling to Bonn to the 23rd UN Climate Change Conference under the Presidency of the Republic of Fiji to negotiate the implementation of the Paris Agreement on Climate Change. Germany is supporting the island state as a technical host.

Several projects funded by the IKI will be part of the conference's programme. At different COP23 locations, both current and new projects alike will present themselves and showcase their best practice stories. We prepared a calendar with IKI relevant side events at COP23 on our website. During the conference, we will also inform you via the IKI Twitter account @iki_bmub about latest news.

On the occasion of the COP23, the website of the IKI shines in new splendor. Our revised publication section and project map allow for an easier and more intelligible browsing. Additionally we are excited to announce that IKI has recently released five new films. In an animated film, the IKI is explained briefly and intelligibly. The other four films each address one of the funding areas. We invite you to browse through our publication section, the new project map or to watch short videos in our media library.
