## IKI Interface Workshops 2021: Mexico, Peru and Ukraine

IKI works via projects and funds in nearly all ODA-countries of the world. In 13 partner countries, IKI intensified the work by installing interface projects. They work closely with the governments of the respective countries. For the purpose of networking and knowledge sharing, annual Interface Workshops gather all representatives from different organisations associated with the projects: implementers, partner institutions, government personell. Due to the on-going pandemic, the latest took place virtually in Mexico, Peru and Ukraine. Further information on the meetings are available here: [Mexico](#), [Peru](#), [Ukraine](#) (will be out soon).
